“Resumes for Children” is a book for adults to read and create resumes for their children. This book includes 22 real children’s resumes, several sample letters, guides to references and areas to explore and an introduction which gives the basics of creating a resume. There are also 40 sample pages for notes and experimental resumes within the book.

A resume, if written correctly, gives a good first impression and helps when competing for jobs. Your child 17 years and younger will greatly benefit from “Resumes for Children” because it provides a way to organize information about themselves that adults can relate to in resume form.
